PROFESSIONAL SUMMARY

Full-Stack Developer with hands-on experience building responsive web applications using React.js, Node.js, Express.js, MongoDB, and Supabase. Experienced in developing complete applications with user authentication, dashboards, databases, online payments, AI features, and third-party services. Comfortable taking projects from development through testing and deployment.

TECHNICAL SKILLS

Frontend: React.js, JavaScript, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, Supabase

Databases: MongoDB, Mongoose, PostgreSQL

Tools & Services: Git, GitHub, Postman, Vite, Vercel, Render, Cloudinary, Paystack

FEATURED PROJECTS

Mera-flo | AI-Powered Women's Health Platform

2026

[Live App](#) | [Backend API](#) | [Frontend Repo](#) | [Backend Repo](#)

- Built a full-stack web application with an AI assistant powered by Llama 3 through Groq.
- Added an AI-to-admin chat experience allowing users to continue conversations with a live administrator when available.
- Developed period tracking, symptom tracking, user and admin dashboards, and secure user accounts.
- Connected frontend, backend, and database to provide a complete, reliable application experience.
- Deployed using Vercel, Render, and MongoDB Atlas.

Tech: React, Node.js, Express, MongoDB, Groq AI, Tailwind CSS, Socket.IO

Facial-Student Voting Platform | Student Database

2026

[Live App](#) | [Backend API](#) | [Frontend Repo](#) | [Backend Repo](#)

- Built a student voting platform with facial verification to confirm registered voters.
- Developed separate student and admin experiences for managing elections and voting activities.
- Added a multi-step voting process designed to prevent duplicate voting.
- Created an admin dashboard for managing student rosters and controlling election status.
- Deployed application using Vercel, Render, and MongoDB Atlas.

Tech: React, Vite, Tailwind CSS, Node.js, Express, MongoDB, Mongoose, face-api.js

Full-Stack E-Commerce Platform | Online Shopping App

2026

[Live App](#) | [Backend API](#) | [Frontend Repo](#) | [Backend Repo](#)

- Built a full-stack e-commerce application with customer accounts and an admin product management dashboard.
- Added product creation, editing, deletion, and image management features.
- Integrated Paystack for online card/account payments.
- Integrated Cloudinary for high-performance product image storage and CDN delivery.
- Designed a responsive shopping experience using React and Tailwind CSS.

Tech: React, Node.js, Express, MongoDB, Mongoose, Paystack, Cloudinary, Tailwind CSS

Unicode | University Management Platform

2026

[Live App](#) | [GitHub](#)

- Built a university management platform with separate dashboards for administrators and students.

- Implemented secure user authentication and role-based access control using Supabase.
- Structured database schemas for managing student records and academic data.
- Designed a responsive, intuitive interface using React and Tailwind CSS.

Tech: React, JavaScript, Supabase, Tailwind CSS

Akara Express | Online Food Delivery Platform

2026

[Live App](#) | [GitHub](#)

- Built a responsive food ordering platform for customers to browse menus and place orders.
- Integrated Paystack for digital payments and EmailJS for instant order confirmation emails.
- Added WhatsApp API integration for direct customer support and live tracking.
- Used Supabase for real-time order status updates and user data storage.

Tech: React, Vite, JavaScript, Tailwind CSS, Supabase, Paystack, EmailJS, WhatsApp API
